## Reduced Internet Browser Access

2026-01-07 - Ian Short - [Comments \(0\)](#) - [Change Warning](#)

Due to the increased cyber security risk in the world at the moment, The Little Group will be going through a series of projects to enhance security within the company and reduce risk.

As part of this we will be reducing the websites that can be accessed from company devices. We already block gambling, firearms and adult sites and we will be adding to those blocked categories incrementally over the next few months. If you try to access a site that is blocked a warning page will be displayed. If you need to access that site for legitimate business reasons please follow the instructions displayed, contacting IT and copying your line manager for authorisation.

Thank you for your support in this process.

Please note that attempted access to blocked sites is registered.

### Web site blocked

The page has been blocked by Little Group as it is deemed to be a Gambling site. If this causes you a business impact please log a call at [gardnerssupport@gardners.com](mailto:gardnerssupport@gardners.com) explaining the impact and copying your line manager for approval.
